

Dear Parent/Guardian,

During this term, Year 1 will be following a unit of work on a theme that focuses on 'the human body.'

This unit of work is part of the International Primary Curriculum. This curriculum sets out very clearly what children will learn – the learning goals – in three different areas:

1. The subjects of the curriculum.
2. Personal development – the characteristics which will help children become more responsible, independent learners.
3. International understanding – which will help children develop both a sense of the independence of their own country and culture and the interdependence between countries and cultures.

Each unit of work is based around specific targets derived from the learning goals for one or more of the subjects.

During this unit we will be focusing on Science, Technology and International.

In Science, we'll be finding out:

- What the main external parts of the body are called
- What the five human senses are
- How we can see, hear, smell, taste and touch
- How the brain connects to other body parts
- How to eat healthily and get enough exercise
- How and why we use medicines
- Why body hygiene is important

In Technology, we'll be finding out:

- How to plan and prepare a healthy meal

In International, we'll be finding out:

- What malaria is and how we can prevent it
- If we can improve the health of the world's children

All of the work we are going to do has been specially written to help your child reach the learning goals. Children will be reading, researching, writing, illustrating, working on their own and working in groups. We will be checking to see how well your child has learned through particular activities and asking children to explain their work, perhaps to you.

We already know the interest you take in your child's work. If you can, please discuss with your child the work they have done as the term progresses and let them teach you.

Help your child to find out about the names for the main parts of the human body and about the five main senses: seeing, hearing, smelling, tasting and touching. Discuss as a family, how you can eat healthily and get lots of exercise.

If your child has some work to research, please help them, but without actually doing the work. If you have the chance to further their interest in the ideas of this theme please take it, but your enthusiasm and interest is most important.

By the end of the unit, we hope your child has achieved all of the learning targets. We hope they have had an enjoyable time in the classroom. And we hope you have enjoyed seeing your child work with enthusiasm. If you have any comments or questions about your child's learning, please get in touch.
